

## CAPACITY BUILDING

### OBJECTIVE

To invest in the effectiveness and future sustainability of the society.

### DESCRIPTION

There are different ways to enhance capacity building. Relevant sectors for action can be:

- Education (e.g. through schools, universities, other education service providers);
- Training (e.g. courses, seminars, webinars, e-learning);
- Networking (e.g. conferences, workshops, sharing platforms, communities of practice, networks of excellence);
- Specific coaching;
- Technical assistance (e.g. expert missions, twinning);
- Involvement of groups at risk.

### EXPECTED RESULTS

Increase the sustainability and institutionalisation of information and knowledge about climate change adaptation.

### RESULT INDICATORS

Number of people involved and informed.

### INVOLVED ACTORS

Communication professionals and population.

### EXPECTED TIMELINE FOR ACTION

- Short term (1-4 years)

### BEST PRACTICES

- London - UK
- Tatabánya - Hungary
- Norway

### CRITICALITIES

Given the many interests and needs of potential target groups, reference materials should be tailored to the target audiences.

## SCOPE OF THE ACTION

- Adaptation

## TYPE OF PROPOSED ACTIONS

- Soft

## SECTOR OF ACTION

- Agriculture / Forests / Land use
- Aquaculture / Fishing
- Biodiversity / Conservation of ecosystems
- Coastal management
- Energy
- Industry
- Public health
- Tourism and leisure
- Transport and infrastructure
- Urban settlement
- Waste management
- Water resource management

## CLIMATE IMPACTS

- Change or loss of biodiversity
- Coastal erosion
- Drought
- Extreme precipitation
- Extreme temperatures
- Fires
- Floods
- Salinization and acidification of water
- Strong winds

## IMPLEMENTATION SCALE

- Municipality
- Region / Country
