PROMOTE BUILDING WORKS FINANCING SCHEMES

OBJECTIVE

To improve urban quality.

DESCRIPTION

To improve urban quality, building financing is used for the purchase of areas for the construction of equipment and/or public services (public parks, car parks, etc.). It is also strategic to the improvement of urban quality, through the decongestion of built-up areas, relocating in whole or in part the relative volumes, or through urban furnishing interventions, creating cycle paths, ecological networks, road adjustments and related intersections.

EXPECTED RESULTS

Demolition of outdated buildings, removal of elements of decay, implementation of interventions aiming at the improvement of urban quality.

RESULT INDICATORS

Areas of redeveloped territory [m^2]

INVOLVED ACTORS

Local stakeholders, government at different levels.

EXPECTED TIMELINE FOR ACTION

- Medium term (5-10 years)

BEST PRACTICES

- Veneto Region – Italy
- Veneto Region – Italy
- UK and Germany

CRITICALITIES

Possible delays with granting of incentives.

SCOPE OF THE ACTION

- Adaptation
- Mitigation

TYPE OF PROPOSED ACTIONS

- Grey
- Soft

SECTOR OF ACTION

- Biodiversity / Conservation of ecosystems
- Urban settlement

CLIMATE IMPACTS

- Change or loss of biodiversity
- Other

IMPLEMENTATION SCALE

- Municipality
- Province
- Region / Country
