

CREATE RIVER LANDSCAPE ITINERARIES

OBJECTIVE

Rehabilitation and restoration of rivers.

DESCRIPTION

Landscape itineraries are characterized by the development of cycle and pedestrian paths that run along the river areas, the improvement of the landscape – environmental qualities of the established and proposed parks, the solution of any critical issue due to the presence of artefacts or activities deemed incongruous with respect to the environment in which they are located, the integration with other connected user itineraries, the strengthening of accommodation facilities and hospitality in the suburban area.

EXPECTED RESULTS

Improved river ecosystem quality.

RESULT INDICATORS

AQI (Air Quality Index)

INVOLVED ACTORS

Local communities and stakeholders, local governments.

EXPECTED TIMELINE FOR ACTION

- Short term (1-4 years)

BEST PRACTICES

- Veneto Region – Italy

CRITICALITIES

Conflict with any current activities in the areas to be redeveloped.

SCOPE OF THE ACTION

- Adaptation

TYPE OF PROPOSED ACTIONS

- Green

- Soft

SECTOR OF ACTION

- Biodiversity / Conservation of ecosystems
- Tourism and leisure
- Water resource management

CLIMATE IMPACTS

- Change or loss of biodiversity
- Extreme precipitation
- Floods

IMPLEMENTATION SCALE

- Municipality
- Province
- Region / Country
